- **MODEL:** Agri-Lifter
- **CAPACITY:** 4,000-5,000lbs
- **FEATURE ONE:** Float Tires
- **FEATURE TWO:** 4-Wheel Drive (optional)

ADDITIONAL DETAILS

AGILE & GENTLE

The new Agri-Lifter is a light, agile forklift that offers high-speed performance in turf applications, as well as other industries, where 4-5000 lb capacities are required. The low ground pressure of this machine as well as an array of available flotation tires allows for superior performance in field applications. Unlike some competitive models, the Agri-Lifter has a full component power train allowing for ease of service on each component. This feature is standard equipment on all Load Lifter rough terrain forklifts. Specific attachments for turf applications are also available.
