# CUSHOTHANE® EZ

The Cold or Wet Storage Specialist

# CUSHOTHANE® EZ

# **Applications**

Engineered specifically to perform in cold and extreme-deep freeze warehouses. This softer compound also excels as a general use drive wheel for medium loads and speeds typically found on Walkie Pallet trucks operating in grocery stores, big box stores and small, clean

# The Finest Cold Storage/Freezer Solution

Maior US made

soft compound

Cushothane® EZ™

Major US made competitor's

soft compound Cushothane® EZ"

competitor's

Smoothest ride and quickest run-out of any flat spot - for less vibration and reduced noise, minimizing machine and operator fatigue and increasing productivity

unmatched performance in wet and cold conditions

Excellent energy savings - very low rolling resistance minimizes battery drainage in cold storage applications and provides longest operating time possible

Highest chunk resistance - especially at low temperature from a specialized polyurethane

#### Superior Select™

(Ships Same or Next Business Day†)

	OEM	OEM Part #	Dimensions
	Raymond®	632-090	10x5x6.5 TSW
	Raymond®	1068262/001	12x4.5x8 SC

	Raymond®	632-104	12x5x9 TSW
	HYG®	524279974	12x5.5x8 TSW
	Crown®	79494	13x4.5x8 TSW
	Crown®	121501	13x5.5x9.5 TSW
	HYG®	524279967	13.5x5.5x8 TSW
	HYG®	524279972	13.5x6x10.5 TSW

Cushothane® EZ™ Tires & Wheels are also available for AGVs and in Ultra-Large OD.

#### Consistently Soft

- Cushothane® EZ™ holds its softness and flexibility beyond the normal cold storage/freezer temperature range
- The competitor's harder compound and different chemistry quickly becomes harder and more brittle in normal cold storage/freezer temperatures, causing a harder ride, loss of traction and chunking.

## Highest Chunk Resistance

- Cushothane® EZ™ is a high performance polyurethane which has a very high cut & tear resistance. Many competitors use a hard polyurethane with modified cure times to achieve a softer compound but sacrifice cut & tear properties.
- Moreover, the Cushothane® EZ™ was engineered to maintain high cut & tear resistance at low temperatures.

### **Available Tread Styles**

- SuperSiped™
- 4. Center Groove
- 2. X-Groove
- 5. Flat (standard)
- 3. Diagonal Groove

FREEZING

"When an end-user has an application where they want a soft ride, need traction, and have had problems with tires chunking off, I always endorse Superior Tire & Rubber Corp's Cushothane® EZ™ compound as the best tool for the job. I've even promoted it's ability to other dealers.'

-Richard Ceccacci, VP - Ceccacci Lift Truck Service

"Recently, a competitor's tire was flat-spotting for us and offered very short and unsatisfactory work life. Superior Tire & Rubber Corp's Cushothane® EZ™ Smooth Crown tire, siped for traction, eliminated the flat-spotting, giving us truly the longest ride and greatest value.

-Bob Bartolomeo, Maintenance Supervisor - SYSCO Foods Services
