ADDITIONAL DETAILS

THE HEART OF THE LINE

Known as the "Heart of the Line", the 2200-2400 offers a full range of features that meet the needs of industries today. Available in both 2 and 4 wheel drive, this forklift was designed around the operator and includes unparalleled visibility and ergonomics. Advanced vibration and sound deadening technologies are used during the design process to provide a quiet and smooth performance. A full range of C-Thru masts makes this forklift perfect for so many specialty applications.
