- **CAPACITY:** 6,000-10,000lbs
- **FEATURE ONE:** 4-Wheel Drive
- **FEATURE TWO:** Ultra View Mast Available

ADDITIONAL DETAILS

COMPACT & RUGGED

Originally developed for the mining industry, the Laborer is a heavy duty, all purpose forklift that offers the features you need in a condensed format. Unlike industrial forklifts, that share the smaller profile, the laborer is available in both 2 and 4 wheel drive and offers true rough terrain performance in a range of applications. The ability to move materials seamlessly from inside your warehouse to your outside yards, separates the Laborer from conventional forklifts. With widths available as small as 54 inches, this model offers a size advantage that few competitors can match.
