- **FEATURE TWO:** Multi-Function Control Handle

ADDITIONAL DETAILS

GO WHERE OTHERS FEAR TO STACK

The 'Counter-Balanced Stacker' is made for those hard to get to places your regular forklift cannot; it's small width of 34.1 inches, makes even more sense when you factor in a lift height of up to 180 inches, and the ability to store and stack loads weighing up to 4000 pounds.

Add the 'Counter-Balanced Stacker' to your fleet, makes perfect sense.
