ADDITIONAL DETAILS

FEATURES THAT WORK FOR YOU

Similar to the lighter 842, the 1056 also offers 360 degree operator visibility, a low profile design, advanced load sense hydraulic system and a high strength boom assembly; all to provide the operator a stable, responsive, high performance experience. Complete with operator select 4-wheel circle steering, 4-wheel crab steering, 2-wheel rear steering and full load sense steering, this forklift will steer you right where you need to go. Factory installed all weather cabs with heavy duty heater, directional vents, dome lights, tempered safety glass, removable door and front & rear wipers are also available to protect you from the elements.
